Kforce quickly provided 30 seasoned project managers who specialized in the healthcare industry.

**Fast Facts**

**Customer Profile:** A large healthcare organization in the Pacific Northwest

**Annual Revenue:** $3.6 billion

**Challenge:** A large healthcare system required seasoned project managers with experience in overseeing multi-state software implementation.

**Solution:** Kforce's national footprint enabled the team to place the required resources in multiple states.

**Outcome:** Kforce engaged 30 project managers on the initiative, using a combination of technology and healthcare verticals to maximize performance.

**Complex Solution for Complex Epic Implementation**

**Challenge**

A major healthcare system was prepping for a major Epic implementation. It planned to roll out a number of Epic modules at its 27 hospitals, 35 clinics and various offices/facilities.

Before work could begin, the system needed a team of project managers to begin planning, coordinating and directing the massive implementation effort at facilities spread across five western states.

The system's Project Management Office (PMO) began searching for staffing firms that could not only provide the best professionals for the job, but also have the depth of resources necessary to support this multistate project.

**Solution**

Kforce was one of five consulting firms to respond to the PMO's request for proposal (RFP). Kforce's approach to the healthcare provider's needs included:

- A strategic combination of local and national support
- A healthcare vertical practice with expertise in niche healthcare technologies
- Dedicated healthcare resources from Kforce's National Recruiting Center (NRC)

**Outcome**

The healthcare system's PMO named the firm as its “Premium Provider.” Kforce has since supplied 30 seasoned project managers for the Epic implementation at a number of the client’s facilities in the Pacific Northwest and Southern California.

In addition, Kforce’s relationship with the healthcare system has become a true partnership. Kforce leaders now meet with the PMO weekly to discuss the performance of the on-assignment consultants, and Kforce has provided consultative support for both the Epic implementation and the healthcare system's contingency procedures.
